

## Jerel Cementing Units Delivered to Uzbekistan

Yantai /May 28th, 2018/ Six cementing trucks independently developed by Jerel were officially delivered to Uzbekistan, a member of SCO (Shanghai Cooperation Organization). Amounting to 4.7 million USD dollars in total, the units will support the rapid development of local oil & gas industry.

As a global group, Jerel has been strengthening the cooperation with SCO members for years, as a response to China's *Belt and Road initiative*. Uzbekistan had 594 million barrels of proven crude oil reserves in 2016, according to *Oil & Gas Journal*. In 2015, total petroleum and other liquids production was 78,900 barrels per day. As presented in the Uzbekistan government's development plan during 2014-2030, the raising energy efficiency with modern innovative technologies and modernization and development of the industrial infrastructure are needed to assure its sustainable economic development.

*Jerel Self-developed Cementing Trucks Delivered to Uzbekistan*

Jerel took this opportunity to expand the market with more innovative well service equipment. The six cementing trucks feature high control accuracy and automaticity, high mixing speed and less operators, which can effectively save labor cost and lower failure rates. Meanwhile, they are armed with real-time data collection and remote control systems to achieve systematic and long-term data management.

After the delivery of cementing trucks, Jerel after-sales engineers would fly to Uzbekistan as well to offer trainings of new slurry mixing system and technical support

Jereh Group

for local operators. Jereh's Vice President Forrest Wang said, "It's a win-win move to support local energy development, since we are able to fulfill self-growth as well."

Jereh entered the Central Asia market a decade ago and has earned reputation with tailored, reliable products ranging from coiled tubing units, cementing trucks and accessories, to CNG fueling stations and gas compressors etc.

With the coming SCO Summit in Qingdao this June, Jereh is ready to take this opportunity to provide more intelligent oil & gas equipment solutions for SCO members to facilitate the oil & gas E&P safer and more efficient.
