

Jerell Showcased New and Up-to-Date Products and Solutions on 2018 GPS

Calgary/14th June 2018/Jerell Group, the leading integrated solutions provider in China, made its debut on 2018 Global Petroleum Show in Calgary between 12th and 14th June. A wide range of self-developed ace products and solutions were presented, featuring 2.375” true tapered coiled tubing string, solutions for fracturing equipment, super coiled tubing units, flowline products as well as micro LNG in North American market. The exhibition was held at an outdoor booth in various forms including sand table, poster wall, videos and so forth to guarantee a satisfying and impressive visual effect.

Jerell booth at GPS attracted many visitors

With excellent technical team, rigorous quality management system and state-of-the-art process, the coiled tubing showcased has obtained API 5ST, ISO 9001, ISO 14001 and OHSAS18001 certification. And it had been applied in high pressure and high corrosion environment with success in North America, showing strong adaptability and technical strength. The product range can vary with grades from TS-70 to TS-130, outside diameter from 1.000” to 3.500” and wall thickness from 0.08” to 0.3”.

2.375" true tapered coiled tubing string

Jereh has made a name owing to its comprehensive capabilities composed of excellent in-house R&D, and manufacturing. The products had been recognized by many local customers such as Trican and Step Energy, as well as global clients covering Schlumberger, Weatherford, ROSNEFT and many other big players.

Sand table of Jereh oil and gas value chain

Another high-profile star was the super coiled tubing unit that is specially designed to cater to Canadian market. It features Jereh ZRT-140K injector and can achieve tubing reel capacity of 14,900ft, 20,500ft and 24,000ft.

It is happy that during the show, we successfully harvested big orders on coiled tubing units and coiled tubing string from local clients.

Mr. Max Liu, head of Jereh North America, said, “We are optimistic about North America market as well as the whole oil & gas industry. Jereh is always ready to cope with the difficulties in front of our customers and to offer integrated solutions for their needs. We will keep on improving technology and equipment capabilities to realize highly-efficient and clean utilization of energy,” Max continued.
